

The *Plum Boys* formed in 2019 during their sophomore year of high school while attending the Fort Worth Academy of Fine Arts in Fort Worth, TX.

All of the original band members sang and toured globally with the Texas Boys Choir when they became friends while attending the Fort Worth Academy of Fine Arts. The *Boys* decided to form the band as a way to further their love for music and begin creating music together.

The bands first performance came in early 2020 at their high schools Valentines dance and was a huge success only to have all of their dreams and aspirations of performing more live performances put on hold for almost two years due to the pandemic.

But the pandemic provided a gateway of hope and inspired the boys to compose and record their first album '*She*' collaboratively and collectively using only GarageBand on their iPhones and laptops at home during the pandemic. By taking influences from their young choral experiences, a wide range of popular music they listened to together and music theory taught in class helped transform their sound into an electrifying Retro-Pop sound engulfed in enormous harmonies.

Upon completion of their first demo tracks for the '*She*' album in 2021, the boys put together a GoFundMe page for friends and family and raised \$2000+ dollars to re-record the demo tracks and master their first album entitled '*She*'. During the process of completing two of the rerecorded tracks for their album the boys got offered a distribution deal through local distribution house *Smith Music* in Fort Worth TX. After the releasing of their first single '*Lexi*' in February of 2022 the *Boys* submitted their music to local public radio station KXT and got aired on the local show with a new found audience and are currently on regular rotation as a local band favorite.

With only weeks leading up to announcing the release of their first album, the *Plum Boys* album '*She*' was selected to be a part of the featured emerging artists with the Fort Worth organization *Amplify817*, a streaming service platform provided by the city's public library foundation which helps to promote the City's diverse and emerging music scene. The Plum Boys quickly shot to the forefront of the 75 plus featured artist quickly out pacing everyone by 2000+ streams and still rising.

In August of 2022 *The Plum Boys* held a release party for their newly completed '*She*' album at *The Post* venue located in the River East district of Fort Worth to celebrate with friends, family and growing base of patrons for the band.

Soon after their release party three of the founding members chose to enter college and a different path for their careers but encouraged Fabian Aguilar (lead vocals) and Caleb Jackson (vocals/keys/guitarist) to continue their dreams of creating more music for the bands success.

Within a few weeks after their release party Fabian and Caleb brought on new band members; Kason Butler (percussion), Dave Cave (bass/lead and rhythm guitar) and Conner Powell (keys/lead and rhythm guitar).

The Plum Boys have recently performed live at several local venues and continue to write new music with a new single entitled '*Make Me Say*' to be released on April 7th of 2023 on all streaming platforms. Their most recent performance as opening support band for the New Wave 80's band '*A Flock of Seagulls*' at *TannaHills Tavern and Music Hall* was a huge success. The Plum Boys have only begun to catch the wind in their sails and popularity and attendance at their shows is growing rapidly. Lastly, The Plum Boys have recently submitted a video into NPR's Tiny Desk competition. And their next show will be on April 2nd at Tulip's in near Southside of Fort Worth district with more shows to be announced.
